

Anatomy and Physiology Plus

Vendor: Essential Training Solutions

Email: usbr.bowtech@gmail.com

Class Format: Home-study

Hours/CE Credit: 16

Cost: \$200

Pre-requisites: Completion of Module 7

I. Rationale:

The course provides an anatomy and physiology review and reference materials for Bowenwork Practitioners

II. Presentation Aims and Outcomes:

Aims:

The course provides an online tutorial and self-assessments for a review of all the body systems. Practitioners can evidence their achievement by taking a copy of their grade book to show their scores or printing the completed assessments.

Specific Learning Outcomes:

Students have access to the following chapters, which they can review and reference at any time:

1. Understand the organization of the body.
2. Understand the anatomy, physiology, and pathologies of:
 - skin, hair, and nails
 - skeletal system
 - muscular system
 - nervous system
 - endocrine system
 - respiratory system
 - cardiovascular system
 - lymphatic system
 - digestive system
 - reproductive system

III. Presentation Requirements:

This class is online. You can sign-on to your e-learning course from any PC at any time to review your progress and to continue your studies. The course provides the tutorial and self-assessments for a review of the body systems. Students must evidence their achievement by taking a copy of their grade book to show their scores or printing the completed assessments to receive continuing education credit. The student will need to manually record total time spent and turn in actual hours.

Resource Readings:

This online course includes:

22 self-assessments with your scores. Your scores are permanently held in your grade book

Access to news forum and logs to share your ideas/tips with other users

Free access to the ETS Resource Centre from which you can download a pack of unlabeled graphics and details of over 180 medical conditions.

IV. Time Allocation:

The student has access to the materials for one year upon enrolling in the class. This high-quality, comprehensive course is genuinely self-paced, and no part of the study requires live attendance.

Students may review the body systems in any order they choose.
